

AAYUSHI SHARMA

UNDERGRADUATE STUDENT

PROFESSIONAL SUMMARY

Undergraduate engineering student exploring Machine Learning, Deep Learning, Computer Vision, and currently working on Quantum Image Processing. I enjoy solving problems through code and building practical projects that blend logic and creativity. Actively seeking opportunities to expand my experience through internships and real-world applications. Apart from tech, I like writing and expressing ideas creatively.

Address:

Niwaru Road, Jaipur, Rajasthan

EDUCATION

Bachelor of Technology, Computer Science Engineering | 2023-Present

JK LAKSHMIPATH UNIVERSITY, Jaipur

PROJECTS

Exploiting Large Language Models for Computer Vision Tasks

Implemented multimodal learning using CLIP, BLIP, and BERT to improve domain generalization in vision tasks. Conducted experiments on PACS dataset using prompt learning, contrastive learning, and transformer-based models.

Currency Convertor (Using Python)

Developed a Python-based currency converter using Tkinter for the GUI and forex-python for real-time exchange rates. Used libraries PIL, io, BytesIO, datetime, and requests for better features and easy currency conversion.

Safest Route Finder (DAA Project)

Used graph theory to predict the safest travel routes based on crime, accidents, and safety factors. (Prims, Kruskal, Dijkstra) Assigned weights to routes using real-world risk factors for better emergency planning.

EXPERIENCE

ML Intern - LNMIIT, Jaipur

May 2025 - July 2025

- Worked on machine learning model experimentation and analysis.
- Contributed to research-oriented tasks involving datasets and evaluation.

Intern - Infosys Springboard 6.0

December 2025 - January 2026

- Completed structured modules and hands-on technical activities.
- Strengthened foundational engineering and problem-solving skills.

TECHNICAL SKILLS

Programming Languages : Python , C , HTML , CSS , SQL

Machine Learning & Data Analysis : Basics Of ML , Data Visualization

Hardware & OS : VHDL , Basic Linux Commands

Tools : Canva , Figma , TORA
